

PS

Write a Java program to print 'Hello World!' on screen

Write a Java program to print the sum of two numbers

Write a Java program that takes two numbers and display the product of two numbers

Write a Java program to print the sum, multiply, subtract, divide and remainder of two numbers

Write a Java program that takes five numbers as input to calculate and print the average of the numbers

Write a Java program to swap two variables

Write a Java program to convert a decimal number to binary numbers

Write a Java program to convert a binary number to decimal number

Write a Java program to check whether Java is installed on your computer or not

Write a Java program and compute the sum of the digits of an integer

Write a Java program to compare two numbers

Write a Java program to count the letters, spaces, numbers and other characters of an input string

Write a Java program to print the ascii value of a given character

Write a Java program that accepts an integer (n) and computes the value of  $n+nn+nnn$

Write a Java program to display the system time

Write a Java program to print the odd numbers from 1 to 20

Write a Java program to print the even numbers from 1 to 20

Write a Java program to convert a string to an integer

Write a Java program to convert seconds to hour, minute and seconds

Write a Java program to compute the sum of the first 100 prime numbers

Write a Java program to swap the first and last elements of an array and create a new array

Write a Java program to count the number of even and odd elements in a given array

Write a Java program to compute the square root of an given integer

Write a Java program to check if a positive number is a palindrome or not

Write a Java program to add two numbers without using any arithmetic operators

Write a Java program to add all the digits of a given positive integer

Write a Java method to compute the average of three numbers

Write a Java method to find the smallest number among three numbers

Write a Java method to count all words in a string

Write a Java method to count all vowels in a string

PS

Write a Java method to compute the sum of the digits in an integer

Write a Java method to check whether an year entered by the user is a leap year or not

Write a Java method to calculate the area of a triangle

Write a Java method to find the area of a pentagon

Write a Java method to find number is even number or not

Write a Java method to check numbers is palindrome number or not

Write a Java method to displays prime numbers between 1 to 20

Write a Java method to find GCD and LCM of Two Numbers

Write a Java method to find factorial using recursion in java

Write a Java program to concatenate two string

Write a Java program to convert all characters in a string to lowercase

Write a Java program to convert all characters in a string to uppercase

Write a Java program to trim a string(remove whitespaces)

Write a Java program to get a substring of a given string between two specified positions

Write a Java program to replace all the 'd' characters with 'f' characters

Write a java program to get the length of a given string

Write a java program to print current date and time in the specified format

Write a Java program to get the character at the given index within the String

Write a java program to remove a particular character from a string

Write a java program to reverse a String

Write a java program to remove html tags from a string

Write a java program to count total number of lines from a string

Write a Java program to sum values of an array

Write a Java program to find the index of an array element

Write a Java program to calculate the average value of array elements

Write a Java program to test if an array contains a specific value

Write a Java program to find the maximum and minimum value of an array

Write a Java program to insert an element (specific position) into an array

Write a Java program to reverse an array of integer values

Write a Java program to find the common elements between two arrays

Write a Java program to find the duplicate values of an array of integer values

PS

Write a Java program to convert an array to ArrayList

Write a Java program to add two matrices of the same size

Write a Java program to find second largest number from the array

Write a Java program to find second lowest number from the array

Write a Java program to find the number of even and odd integers in a given array of integers

Write a Java program to get the difference between the largest and smallest values in an array of integers

Write a Java program to segregate all 0s on left side and all 1s on right side of a given array of 0s and 1s

Write a Java program to cyclically rotate a given array clockwise by one

java program to print all unique element in an array

Write a Java Program to Sort the Array in an Ascending Order

Write a Java Program to Sort the Array in an Descending Order

Write a Java Program to Sort Names in an Alphabetical Order

Write a Java Program to Display Transpose Matrix

Write a Java Program to Search Key Elements in an Array

Write a Java Program to Accept the Marks of a Student and find Total Marks and Percentage

Write a Java program to take three numbers from the user and print the greatest number

Write a Java program to find the number of days in a month

Write a Java program to test a number is positive or negative

Write a Java Program to accept number of week's day (1-7) and print name of the day

Write a Java program that takes a year from user and print whether that year is a leap year or not

Write a Java program to input 5 numbers from keyboard and find their sum and average

Write a program in Java to display the first 5 natural numbers

Write a java program to check vowel or consonant

Write a Java program to display the cube of the number upto given an integer

Write a Java program to display the n terms of odd natural number and their sum

Write a Java program to display the multiplication table of a given integer

Write a Java program that reads an integer and check whether it is negative, zero, or positive

Write a Java program that reads an positive integer and count the number of digits

Write a Java program that accepts three numbers and check All numbers are equal or not

PS

Write a java program that accepts three numbers from the user and check if numbers are in “increasing” or “decreasing” order.

Write a Java program that determines a student’s grade

Write a Java program to create a simple calculator

Write a Java program to create a new array list, add some elements (string) and print out the collection

Write a Java program to insert an element into the array list at the first position

Write a Java program to remove the third element from a array list

Write a Java program to sort a given array list

Write a Java program to shuffle elements in a array list

Write a Java program to increase the size of an array list

Write a Java program to reverse elements in a array list

Write a Java program to compare two array lists

Write a Java program to swap two elements in an array list

Write a Java program to join two array lists

Write a Java program to empty an array list

Write a java program to print numbers from 1 to 10 using loop

Write a java program to calculate the sum of first 10 natural number using loop

Write a Java program to print multiplication table of given number

Write a Java program to find the factorial value of any number entered through the keyboard

Write a Java program that prompts the user to input an integer and then outputs the number with the digits reversed order

Write a Java program that reads a set of integers, and then prints the sum of the even and odd integers using loop

Write a Java program to check whether the number is a prime number or not

Write a Java program to calculate HCF of Two given numbers using loop

Write a Java program to enter the numbers till the user wants and at the end it should display the count of positive, negative and zeros

Write a Java program to enter the numbers till the user wants and at the end the program should display the largest and smallest numbers entered

Write a Java program to print out all Armstrong numbers between 1 to 600 using loop

Write a java program to count total number of notes in entered amount using loop

Write a Java program to print Fibonacci series of n terms where n is input by user using loop

PS

Write a java program to calculate the sum of following series where n is input by user
